SUMMARY

Motivated Information Technology graduate specializing in Cyber Security and Forensics with strong interest in Linux Administration, Python Development, and Server Management. Seeking an entry-level Linux Administrator, Python Developer, or Technical Support role to apply technical skills and gain hands-on industry experience.

EDUCATION

Bachelor of Technology (B.Tech) Information Technology specialization in Cyber Security and Forensics

Noorul Islam University

06/2022 – 05/2026 | Kanyakumari

SKILLS

Programming & Development:

Python, HTML, CSS, Django, Ionic Framework

Cybersecurity

Ethical Hacking, Kali Linux, Wireshark, Computer Networks, Server Auditing, Nmap

Tools & Technologies:

GitHub, Linux, Machine Learning

CERTIFICATIONS

Practical Cyber Security

NPTEL via Swayam November 2024

Privacy and Security in Online Social Media

NPTEL via Swayam May 2025

Python

GUVI December 2025

AWARDS & HONORS

National-Level Karate Champion

State Level Athlete

National Cadet Corps (NCC)

INTERNSHIP

Postulate Info Tech Pvt. Ltd

Full Stack Web Development Intern

12/2025 – 03/2026 | Thoothukudi

- Contributed to real-time production projects using **Django** (Backend) and **Ionic Framework** (Frontend).
- Designed and integrated secure REST APIs.
- Performed basic **server security assessments**, verifying system configurations and monitoring potential security risks.
- Supported secure deployment and adhered to cybersecurity best practices.

Cyber security Intern

06/2025 | Thoothukudi

- Collaborated with experienced professionals to support the monitoring and enhancement of their security.

Jellysoft

Web designing Intern

06/2024 | Thoothukudi

- Created user-friendly web pages with an emphasis on accessibility and performance.

PROJECT

SIEM Framework [🔗](#)

12/2025 – 05/2026

Implementing threat classification and monitoring to improve detection accuracy and support SIEM-based cybersecurity analysis.

Tech Stack: Python, Ionic Angular, Typescript, CSS

Stock Maintenance System [🔗](#)

07/2024 – 11/2024

Built a web-based inventory management system that allows users to add, update, and delete product records while maintaining stock data in a database. Designed a responsive interface and integrated backend logic for efficient stock tracking and management.

Tech Stack: HTML, CSS, JavaScript, PHP, MySQL
